

CONTENTS

ALGAL NUTRIENT LIMITATION AND THE NUTRITION OF AQUATIC HERBIVORES, <i>Robert W. Sterner and Dag O. Hessen</i>	1
GENETIC ARCHITECTURE, GENETIC BEHAVIOR, AND CHARACTER EVOLUTION, <i>Gabriel Moreno</i>	31
MOLECULAR APPROACHES TO POPULATION BIOLOGY, <i>Jeffry B. Mitton</i>	45
UNISEXUAL FISH: Model Systems for Studying Ecology and Evolution, <i>Robert C. Vrijenhoek</i>	71
COOPERATION AND CONFLICT IN THE EVOLUTION OF SIGNAL INTERACTIONS, <i>Michael D. Greenfield</i>	97
EVOLUTIONARY BIOLOGY OF HUMAN IMMUNODEFICIENCY VIRUS, <i>Andrew J. Leigh Brown and Edward C. Holmes</i>	127
METAPOPULATION DYNAMICS AND GENETICS, <i>Alan Hastings and Susan Harrison</i>	167
COMMUNITY STRUCTURE: Larval Trematodes in Snail Hosts, <i>Armand M. Kuris and Kevin D. Lafferty</i>	189
THE EVOLUTIONARY INTERACTION AMONG SPECIES: Selection, Escalation, and Coevolution, <i>Geerat J. Vermeij</i>	219
THE SYSTEMATICS OF CORAL GENUS <i>Acropora</i> : Implications of New Biological Findings for Species Concepts, <i>C. C. Wallace and B. L. Willis</i>	237
A DAY IN THE LIFE OF A SEED: Movements and Fates of Seeds and Their Implications For Natural and Managed Systems, <i>Jeanne C. Chambers and James A. MacMahon</i>	263
THE EVOLUTION OF VOCALIZATION IN FROGS AND TOADS, <i>H. Carl Gerhardt</i>	293
PHYLOGENY OF THE LEGUME FAMILY: An Approach to Understanding the Origins of Nodulation, <i>Jeff J. Doyle</i>	325

viii CONTENTS (continued)

USING DNA SEQUENCES TO UNRAVEL THE CAMBRIAN RADIATION OF THE ANIMAL PHYLA, <i>Rudolf A. Raff, Charles R. Marshall, and James M. Turbeville</i>	351
GENETICS AND ECOLOGY OF WHALES AND DOLPHINS, <i>A. Rus Hoelzel</i>	377
FISHERIES ECOLOGY IN THE CONTEXT OF ECOLOGICAL AND EVOLUTIONARY THEORY, <i>Kenneth T. Frank and William C. Leggett</i>	401
ECOLOGY AND EVOLUTION OF REPRODUCTION IN MILKWEEDS, <i>Robert Wyatt and Steven B. Broyles</i>	423
THE NATURE AND CONSEQUENCES OF INDIRECT EFFECTS IN ECOLOGICAL COMMUNITIES, <i>J. Timothy Wootton</i>	443
INTEGRATIVE APPROACHES TO EVOLUTIONARY ECOLOGY: <i>Anolis</i> Lizards as Model Systems, <i>Jonathan B. Losos</i>	467
THE ECOLOGICAL CONSEQUENCES OF SHARED NATURAL ENEMIES, <i>R. D. Holt and J. H. Lawton</i>	495
DIVERSIFICATION IN AN ARID WORLD: The Mesembryanthemaceae, <i>H.-D. Ihlenfeldt</i>	521
GENETIC DIVERGENCE, REPRODUCTIVE ISOLATION, AND MARINE SPECIATION, <i>Stephen R. Palumbi</i>	547
ADAPTATION AND CONSTRAINT IN COMPLEX LIFE CYCLES OF ANIMALS, <i>Nancy A. Moran</i>	573
MALE PARENTAL BEHAVIOR IN BIRDS, <i>Ellen D. Ketterson and Val Nolan, Jr.</i>	601
RELATIONSHIPS AMONG MAXIMUM STOMATAL CONDUCTANCE, ECOSYSTEM SURFACE CONDUCTANCE, CARBON ASSIMILATION RATE, AND PLANT NITROGEN NUTRITION: A Global Ecology Scaling Exercise, <i>E.-Detlef Schulze, Francis M. Kelliher, Christian Körner, Jon Lloyd and Ray Leuning</i>	629
INDEXES	
Subject Index	661
Cumulative Index of Contributing Authors, Volumes 21-25	681
Cumulative Index of Chapter Titles, Volumes 21-25	683

SUBJECT INDEX

A

Abiotic factor

- fish populations and, 411
- seasonal plankton production cycle and, 404
- seed dispersal and, 263, 267, 268-71
- seed loss and, 277
- seed/microsite interactions and, 274-75

Abrams, P. A., 227-28, 229, 230

Acacia alba, 646

Acanthaster planci, 240

Acanthina angelica, 450

Acanthidiaptomus

- specific P content, 10

Acanthocephalus, 360-62

Acartia tonsa

- growth rate, 13-14

Acid rain, 647

Acoelomate, 359

Acorn barnacle, 450

Acoustic insect

- graded aggressive signals, 118
- inhibitory resetting, 105
- synchrony and alternation, 108-9

Acoustic signaling

- aggression and, 117
- "beacon" effect, 111
- sexual advertisement and, 98

Acoustic spore, 119

Acquired immunodeficiency syndrome (AIDS), 128, 143, 154-56

Acquisition, 4

Acridid grasshopper

- call timing, 106, 118
- dawn and dusk choruses, 99
- rhythmic alternation, 112

Acris

- geographic variation in calls, 299-300

Acris crepitans

- clinal variation in call frequency, 316
- dominant vocalization frequency, 298

Acris gryllus

- clinal variation in call frequency, 316

Acropora, 237-56

- biogeographic consistency, 250
- biogeographic diversity, 250-51

breeding compatibilities, 244-46

gene flow, 247-49

mating incompatibilities, 243-44

patterns of distribution, 251-52

phylogenetic studies, 253-54

species boundaries, 241-47

Acropora brueggemanni, 251

Acropora cuneata, 240

taxonomic distinctiveness, 248

Acropora donei, 254

Acropora formosa, 248

Acropora millepora

fertilization in reciprocal

crosses, 242

natural hybrids, 243

Acropora nasuta, 249

Acropora nobilis, 248

Acropora palifera, 240

taxonomic distinctiveness, 248

Acropora pulchra

natural hybrids, 243

Acropora pulchra/millepora cross

karyotypic analysis, 247

Acropora selago, 251

Acropora tenuis, 254

Adaptation, 32

complex life cycles and, 580-82

cost-benefit approach, 227-29

enemy-related, 220

Adaptive decoupling, 573, 588

Adaptive radiation, 527

interspecific competition and,

470, 477-81

Adelina triboli, 503

Adoutte, A., 358

Advertisement call, 293

acoustic properties

female selectivity and, 303

maximum broadcast area, 296

African green monkey

immunodeficiency virus, 131

Aggression

acoustic signaling and, 117

Ahlgren, G., 9

AIDS

- See Acquired immunodeficiency syndrome

Aizoaceae, 523

Alberch, P., 591-92

Alectoris rufa, 506

Alfalfa

leghemoglobins, 340

Algae

- biochemical and elemental composition, 4

C:N:P ratios

in situ patterns, 7-8

toxicity, 14

Algal biomass

biomolecules, 3

Algal cell

nutrient content, 5

Algal-herbivore interface, 1-23

Algal nutrient limitation, 5-9

Allocastrina dicaniana, 646

Allopatric speciation, 548

Allopolyploidy, 316

Allozyme electrophoresis, 248

Allozyme heterozygosity

fitness and, 57-58

Allozyme polymorphism, 52

Allozyme variation, 53

population size and, 48

Alpheid shrimp, 558

Alternation

competitive, 116-17

as epiphenomenon, 108-9

mechanism, 107-8

phase delay, 105-7

rhythmic, 112-14

signal interactions and, 99

Amazon molly, 71-72

Ambystoma

multiple hybrid events, 75

Ambystoma tigrinum

growth rate

allozyme genotype and, 57

Amino acids

herbivore growth and, 8

pelagic herbivore diet and, 3

replacement substitutions, 149

Amos, W., 380

Amphibian

complex life cycles, 577, 588-89

male parental care, 602

unisexual, 72

Amphipod, 558

osmoregulatory differences, 566

Anargus epos, 507

Anax junius, 498

Andersen, T., 17

Anderson, D. T., 365-66

Andrewartha, H. G., 168

Andricus quercuscalicis, 507

Anemone, 449

Angiosperm

chloroplast DNA

inheritance, 47

Animal phyla

Cambrian radiation

DNA sequencing and, 351-71

- Animals
 complex life cycles, 573–96
 diploblastic, 357–58
 radiations
 coelomate, 356
 seed dispersal and, 263, 267, 271–73
 seed/microsite interactions and, 275
 Annelid, 360, 363–64
 Annett, C. A., 605–6, 608
 Anolis, 223, 455, 469–70
 evolutionary ecology, 467–88
 interspecific interactions, 470–84
 Anolis aeneus, 481
 Anolis allisoni, 473
 Anolis bahorucoensis, 481
 Anolis bimaculatus, 475, 483
 Anolis carolinensis, 476
 Anolis cristatellus, 483
 Anolis evermanni, 483
 Anolis gingivinus, 475, 483
 Anolis gundlachi, 483
 Anolis leachi, 476
 Anolis porcanus, 473
 Anolis sagrei, 476
 Anolis wattsi pogus, 475, 483
 Ant
 seed dispersal and, 272, 282
 Antigenic diversity, 154
 Antigenic drift, 149
 Antonovics, J. P., 172
 Anuran
 adaptive variation in tadpole traits, 588
 auditory organs, 304
 auditory tuning
 temperature-dependent shifts, 307
 compartmentalization and, 592
 inhibitory resetting, 105
 polyploid speciation, 316
 rhythmic signaling, 99
 sensory exploitation, 312–13
 signal interactions, 99
 size-assortative mating, 310
 synchrony and alternation, 108–9
 vocalization
 mating success and, 294
 Aphidoidea, 577
 Aphid, 576
 complex life cycles, 577–78
Apis mellifera
 protein polymorphism, 49
Apodemus sylvaticus, 503
 Apparent competition, 443, 449–50, 495, 496–97
 protist assemblages and, 509–10
 Apparent mutualism, 499
 Apparent predation, 499
 Aquatic herbivore
 absolute dietary requirements, 3
 competition and community composition, 17–19
 dietary imbalance, 16–17
 feeding, 12–13
 growth, 13–16
 nutrient cycling and regeneration, 21–22
 secondary production limitation, 19–21
Arabidopsis, 326
 anther-specific proteins, 338
 Arak, A., 312
Arcohelia, 241
 Arctic fox, 501
 Arctic hare, 511
Argyroderma congregatum, 531
Argyroderma crateriforme, 531
Argyroderma delaetii, 531
Argyroderma fissum, 531
Argyroderma pearsonii, 531
 Arid habitat
 diversification and, 521–43
Aristida longiseta, 274
 Arrow worm, 368–69
 Arthropod, 356, 360, 364–68
 molecular systematics, 367
 monophyly vs polyphyly, 364–67
 rhythmic signaling, 99
 Articulata, 367
 Aschelminth, 360
 Ascidian, 370
 Asclepiadaceae, 423–25
Asclepias, 424–25
 floral morphology and anatomy, 425–27
 self-incompatibility systems, 427–28
Asclepias amplexicaulis
 flower morphology, 426
Asclepias curassavica, 427
 nectar production, 429
Asclepias exaltata
 fruit-set, 428
 germination, 429–30
 nectar production, 429
 pollen dispersal, 431–33
Asclepias fruticosa, 427
Asclepias incarnata, 427
 interspecific hybridization and, 434
Asclepias perennis, 427
 hybrid sterility, 434
Asclepias purpurascens
 hybrids, 434
Asclepias quadrifolia
 fruit-set, 428
 interspecific hybridization and, 434
 nectar production, 429
Asclepias speciosa
 interspecific hybridization and, 434
Asclepias subulata, 427
Asclepias syriaca, 426–27
 fruit-set, 428
 germination, 429–30
 interspecific hybridization and, 433–34
 nectar production, 429
 pollen dispersal, 432
 self-pollination, 430–31
Asclepias texana, 427
 hybrid sterility, 434
Asclepias tuberosa, 427
 fruit-set, 428
 self-pollination, 430
Asclepias verticillata, 427
 fruit-set, 428
 interspecific hybridization and, 433–34
 nectar production, 429
 Asexual species
 evolutionary dead ends, 86–87
 Assimilation, 4
 Assimilation efficiency, 2
 Associative overdominance, 57
 Asteraceae, 523
Asterias forbesi, 560
Asterias vulgaris, 560
 Astigmatid mite
 adaptive evolution of immature stages, 590
Astragalus, 332
Athene cunicularia, 498
 Atmosphere
 water vapor transfer between terrestrial ecosystems and, 632–34
 Australian burrowing frog
 calling sites, 298
Austrobrilharzia, 205
Austrobrilharzia terrigenensis, 192, 205
 Autopolyploidy, 317
 Autotroph
 cellular composition, 4
 consumption in pelagic environments, 3
Avena barbata
 allozyme genotype viability, 57
 Avise, J. C., 553
 Ayre, D. J., 248
 Azidothymidine (AZT), 146
 long-term efficacy, 128
